EDIUS 11 New Feature: Auto color correction

FAQ ID : 000026281 | Date : 2024/12/23

From 11.20.16172, Auto color correction is available for easier video color correction

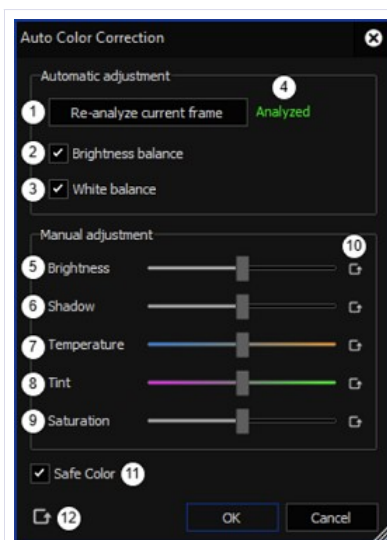

EDIUS automatically analyzes the video and adjusts the brightness and white balance to create a neutral image.

Procedure

- 1) Place a video clip onto the timeline.
- 2) Open Effect palette then select **VideoFilters > Color Correction**.
- 3) **Drag and drop** either **Auto Color Correction** or Auto Color Correction – Brightness Balance onto placed clip.
- 4) You will see automatically adjusted footage in the preview window.
